

# SurfPass

Take control of Internet access, simply.

- URL filtering and blocking. 1,000,000 sites!
- Usage time limit
- Control of Windows applications
- Activity logging
- Content analysis and filtering
- Management with groups and profiles
- Synchronization with Active Directory
- Standalone or networked computers

***Meets the requirements for multiple needs.***

- Educational institutions
- Libraries
- Administrations
- Companies
- Business centers
- Health

## Full control of computers usage

- Internet applications control and filtering.
  - Control and filtering of the Web and other Internet applications: Email, FTP, chat, P2P (peer to peer)...
  - Content filtering.
  - Filtering with black list or white list of addresses / URLs.
  - Black lists containing more than 500,000 sites!
  - Automatic downloading and updating of filtering lists.
  - SurfPass can import databases created for the proxy Squid and SquidGuard, such as those of the University of Toulouse 1.
- Control Internet applications and many other Windows applications: MS Office, productivity software...
- User accounts can be limited, unlimited or unlimited with a counting:
  - Time credit usable over an unlimited period.
  - Time credit usable over one limited period.
  - Time credit usable in only one session.
  - Validity dates (beginning / end) for user accounts can be set.

## Well suited to large installations

- Management of filtering, timetable and application control with groups and profiles.
- Management of computers with groups and profiles.
- Authorization matrix between user groups and computer groups.
- The activity of all the stations is centralized in the same database.

## Easy to administer

- Administration is completely centralized.
- Management by profile and group offers great flexibility of administration.
- SurfPass can be interfaced with Active Directory, avoiding the need for double identification to Winlogon and SurfPass as well as the duplication of user accounts.
- Ability to block a user account or a group.
- Logs of time spent and visited sites for all users, a group, a user between two dates.
- SurfPass 3 ships with SurfLook to monitor use of the Internet in real-time.

## A robust and powerful architecture

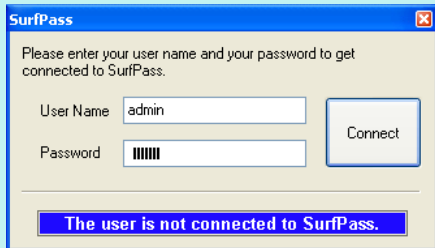

- SurfPass 4 is a true client/server application.
- Our distributed filtering architecture doesn't slow down the web browsing.

## Required configuration

Clients computers Windows 7 / Vista / XP SP3  
Server computers Windows 7 / 2008 R2 / Vista / 2008 / XP SP3 / 2003 SP2. TSE Compatible.
